

From Earth to Mars Program

Simple Manual

- Leave the earth - Press the button 'f' to fly the spaceship from the earth to mars at closest distance between the earth and mars.
- Change the main view - Press the button 'z' to change the main view to top down view, and press the button 'x' to change it back.
- More realistic - Included the orbit of Earth and Mars, the self rotating speed of Earth is roughly 2 times faster than Mars.
- Special design of the Spaceship (or can be recognised as the satellite).
- More accurate calculations of objects moving.
